

# THIRD INTERNATIONAL CONFERENCE ON INNOVATIONS IN CYBERSECURITY AND DATA SCIENCE

## ICICDS 2026

25-27, June 2026

### ABOUT ICICDS 2026

ICICDS 2026 aims to bring academicians, industrialists, technocrats, researchers, and experts from the field of computer science, computer applications, information technology, Artificial Intelligence, and all other relevant fields to a common forum to explore and discuss innovative research ideas and findings in the fields of IoT, big data, data management and analytics, and security. The theme of ICICDS, "Data-Driven Technologies and Cybersecurity," highlights the significance of research and development activities in the fields of data science and cybersecurity to incorporate the benefits of these technologies to enhance the quality of life. The conference attendees would gain more research insights on processing and analyzing vast amounts of data quickly and securely to improve the efficiency of their workplace and augment the everyday work humans do, such as monitoring, communication assistance, behavior analysis, decision making, security, privacy, and trust. They would also gain insightful knowledge on preventing sensitive information using cybersecurity practices. ICICDS promotes scientific information interchange between researchers, developers, engineers, students, and practitioners working in India and abroad.
